

BUCKINGHAM PALACE

The following are illustrated sacred geometric connections that appear to exist at certain key locations of Royal prominence in the city of London and its surroundings. It is London that truly pays homage to at least 2 prominent Angles that are situated at key location as the charts will attempt to approximate and illustrate. The city of London is riddled with a spectacular array of pentagrams, owls, pyramids, serpents, towers, masonic symbology of square and compass, hexagrams, etc. What is of particularly significance is that such alignments correspond to the Royal Residences of the British Monarchy. Does all these hidden alignments depict who really controls the Monarchy?

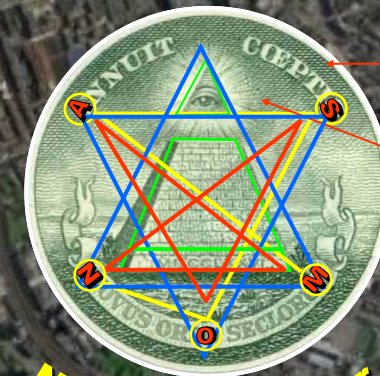

THE GREAT PYRAMID PATTERN

This study suggests that the various monuments and 'gates' to the city such as London are in fact 'Stargates' or portals to inter-dimensional realms. The veil between space-time-mater and the spiritual is very fine and given the right 'magic' and sacred geometry, those in the 'know' have a realization that there is an exchange occurring. It is no mere coincidence that ley-lines in parks for example are designed the way they are and statues honoring Angels, Fallen ones at that are set up at such junctures. The Bible is very clear that cities and capitals of the world are ruled by the Luciferians and have Principalities and Powers or 'Fallen Angels' influencing over them.

The entire layout is construed in the same pattern that is seen in Washington DC and the Vatican. In the case of the District of Columbia, the layout is deemed the New Rome that is patterned after the Vatican in Rome. The is basically a n 'Obelisk' type of phallus symbol at the based of the pyramid. From, there, the area is construed to be like a pyramid comprised as 'The Mall' which is exactly named as that in both cases. It then terminates with its capital or building to commemorate the capstone. In the case of Buckingham Palace, the Trafalgar Square column is as the Washington Monument. The Capital Building would be as the Palace, etc.
