

# SENTINEL DEVICE QUICK START GUIDE

## Post-event mode instructions

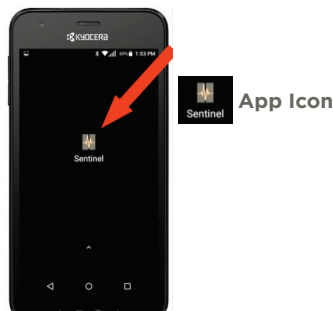

- 1 For event recording only.
- 2 To start recording or to store events.
- 3 Flashes every 10 seconds during recording.
- 4 Flashes green every 10 seconds while recording. Will flash red if battery is low.

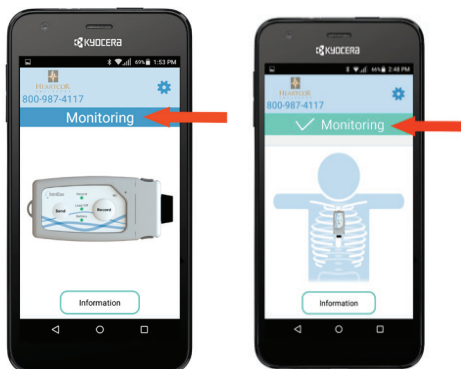

### Step 1: Set up your device

**Before you start:** The Sentinel device recorder and smartphone work together and both are required for recording. This is a locked smartphone for monitoring only. This device should not be used for any other purpose. Keep the phone with you at all times.

1. Turn on Sentinel smartphone.
2. Check battery power.
3. Open the HeartcoR Sentinel app on the smartphone.

4. When the app opens, you will see these screens.

### Step 2: Attach wireless adaptor

1. Choose adaptor for post-event mode.

2. Connect wireless adaptor to the Sentinel device recorder.

3. Press the two side buttons while connecting adaptor. Do not force adaptor into position.

When adaptor is connected, the recorder will beep.

### Step 3: Weekly or symptomatic recording

1. For weekly recordings or symptomatic events, place device on chest under collarbone.
2. Press and hold Record button until you hear a beep.
3. Release button.
4. Hold device to chest for 60 seconds. Device will beep when done recording.

### Step 4: Return to site

Return Sentinel smartphone, recorder and accessories to study site.

#### Battery life

If battery power is low:

- Charge the battery using the charger provided.
- Charge Sentinel device every 7 days (or whenever red light appears) to keep charged until a symptomatic event occurs.
