

Metal Bond - Grinding Grit

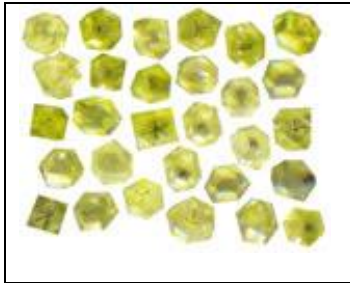

SMG – Series

Sizes Available: 80 – 500 Mesh

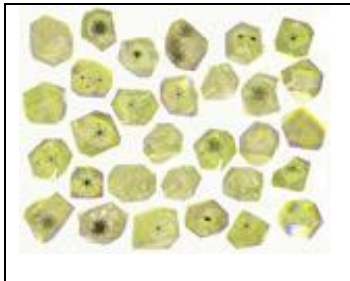

SMG-880 consists of blocky cubo-octahedral crystals. Good impact strength and thermal stability.

This product ideal for a wide range of grinding applications.

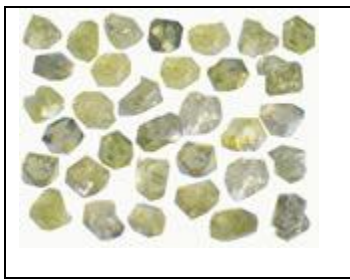

SMG-680 contains a relatively high level of cubo-octahedral crystals.

This product is recommended for grinding stone, ceramics and glass.

SMG-480 is a medium strength diamond abrasive containing blocky crystals.

This product is ideal for grinding medium hard materials.

SMG-280 is a slightly friable diamond suitable for general-purpose metal bond tools.

This product can also be used for vitreous bonded tools.
