New York City Office:

2 Penn Plaza, Suite 1500
New York, New York 10121
212 292.5135

To Whom It May Concern:

My personal association with Kris Kimmel began many years ago where he was employed by Kimmel Sheet Metal preparing and coordinating ductwork shop drawings for HVAC systems. While at Kimmel Sheet Metal, Kris was trained by one of the best, if not the best mechanical system coordinators that I know and that person is his father Fred Kimmel.

We recently obtained the services of Kris B. Kimmel Construction Drafting, Inc. to review and coordinate the mechanical and electrical systems on a 230,000 square foot vertical expansion to a hospital facility. Kris provided the design team with the location of all problem areas, resolution to the conflicts and areas where we could save money. This information was needed quickly and Kris responded within the time frame agreed upon and provided the team with very valuable information that allowed us to make decisions and complete the design.

Kris is very professional with the experience and knowledge to take the lead in coordinating any mechanical system.

I personally highly recommend Kris Kimmel for your project.

Should you have any questions please feel free to contact me at 585-271-5256.

Sincerely,

Mark F. Bollin
Project Director
