NOTES:

SRL (State Reporting Level): indicates the minimum reporting level required by the Washington Department of Health (DOH) Trigger Level: DOH Drinking Water response level. Systems with compounds detected at concentrations in excess of this level are

required to take additional samples. Contact your regenional DOH office for further information. MCL (Maximum Contaminant Level): If the contaminant amount exceeds the MCL, immediately contact your regional DOH office. NA (Not Analyzed): in the results column indicates this compound was no included in the current analysis.

ND (Not Detected): in the results column indicates this compound was analyzed and not detected at a level greater than or equal to the SRL.

<(0.001): indicates the compound was not detected in the sample at or above the concentration indicated.
