Subject: Briefing the Kaiser Fellows in Detroit

This is a very belated note to thank you all for the excellent series of briefings you gave the journalists assembled in Detroit on April 14th—we really appreciate all the time taken to pull the data and information together, and for such an informative and educational set of presentations and discussions. Our day in Detroit was a real learning curve for many in the group, and it was immensely helpful to visit CHAG and the Horizons Project with a strong grasp of the data and trends, and the City's response, on both HIV/AIDS and other STDs. Many thanks to you all!

Detroit clearly faces some real challenges, but our group was struck by one thing: the really talented, dedicated and informed healthcare leadership in the City and State. Some of the journalists were a little wistful when they compared that with the situation in their own hometown/State.

Many thanks for what you do to confront the health challenges in Detroit, and for taking the time to brief and educate us all. We greatly appreciate it.

Very best wishes, Penny
