

# BRIDGE PLUGS & CEMENT RETAINERS

BARRACUDA OIL TOOLS, LLC

## CAST IRON BRIDGE PLUG

The Barracuda Top-Set Bridge Plug is a compact and economical unit, engineered for fast running downhole on tubing or electric wireline. An internal ratchet lock ring stores the setting force in the Plug. The one-piece packing element and metal back up rings combine for a superior seal.

### FEATURES

- Metal backup rings prevent extrusion of the rubber at high pressure and temperature
- Internal ratchet lock ring retains the dynamic force induced in the retainers during the setting operation
- Case-hardened, one piece slips with carbide button inserts, designed to bite casing hardness up to Q-125

Casing		Range		Tool OD	Shear Stud Value (lbs)	Max. Differential Pressure (psi)
OD	Weight	Min. ID	Max. ID			
2-3/8	4.0 - 5.8	1.780	2.074	1.75	9,000	10000
