

# Trike Build 2022

West Branch Middle School CBI Program

# Step One: Take pictures of the trike.

Photographer must take pictures of the trike.

- Front
- Back
- Sides

**THIS VERY IMPORTANT!** You will need these pictures to help you identify where everything goes when you start to reassemble the trike.

**THE MORE PICTURES THE BETTER.**

## Step Two: Take the trike apart.

Take the trike apart and bag and tag everything.

**THIS IS ALSO VERY IMPORTANT.** You want to keep track of all of the parts, what they are, and where they go.

This will be very helpful when you reassemble the trike.

**TAKE YOUR TIME! THERE IS NO HURRY!**

## Step Three: Parts inspection.

Look at the parts and decide what needs to be replaced and what needs to be repainted.

## Step Four: Order parts.

Order parts that need to be replaced and pack and send parts away that must be painted or powdercoated.

## Step Five: Inventory new parts

When the new parts come in they must be checked to make sure that what was ordered is what we received. They must also be inspected for damage and fit.

## Step Six: Assemble the Trike

Using the pictures taken at the start of the project, the trike must be put back together.

Take your time and do it right.!

## Step Seven: Enjoy

Enjoy a job well done!  
We will take pictures and create a video to celebrate  
your accomplishment!
