

K5 Drinking Water Station Cartridge Options

Customized filtration for worry-free drinking water

Better water, brilliantly designed

Only one drinking water system is so advanced that it can remove nearly everything from your home's drinking water that isn't water: The Kinetico K5 Drinking Water Station.

- Three standard filters, designed to transform your ordinary household water into crystal-clear, unbelievably great-tasting drinking water
- Two revolutionary FlexFilters, completely customizable to your water's specific filtration needs

Choose your configuration

The K5 is fully customizable in order to meet the needs of virtually any home. It also comes pre-configured in the four packages listed below. Each package is designed to address a specific set of filtration needs.

Standard

Three filters—one to remove chlorine, another to remove contaminants such as metals and nitrates, and one more to eliminate additional compounds that could result in foul tastes and odors.

Guard

Offering all the protection of the standard configuration, this package goes on to safeguard your family against volatile organic compounds such as pesticides, paints and other chemicals.

Enhance

By adding minerals to water already treated by the standard configuration, this package actively supports your nervous system—helping to build strong bones, regulate blood flow and relax muscle tension.

Biopure

While the standard configuration cleans your water, this package goes even further, offering the ultimate in purification to alleviate all your water worries and provide total peace of mind.

Customize your own

The K5's revolutionary dual FlexFilters provide customizable filtration to tackle your water's specific filtration needs. Use any two of the following cartridges or none at all—the choice is yours.

Purefecta Guard—Generates biopure drinking water, significantly reducing 99.99999% of bacteria and 99.99% of viruses

VOC Guard—Significantly reduces volatile organic compounds (pesticides, paints, cleaning supplies and other chemicals)

Arsenic Guard—Specifically designed to filter arsenic (As III) to ensure its complete removal

Perchlorate Guard—Occurring as the byproduct of certain forms of manufacturing, perchlorate has been shown to have adverse effects on the thyroid and has been detected in drinking water and ground water in 35 states

Chloramine Guard - Significantly reduces chloramine, a chemical used to treat approximately 1/3 of US municipal water sources

Mineral Plus—This additive cartridge lets you add beneficial minerals such as magnesium and calcium to your treated drinking water
