WINTER ROAD MAINTENANCE CONTRACT  
(South Section)

This contract is between the Town of Parsonsfield (referred to as "we" or "our") and __________________________ (referred to as "you"). When this contract refers to you, it includes your employees and agents. The subject of this contract is Winter Road Maintenance (sanding, salting, and plowing) for the South Section of Parsonsfield.

1. SERVICES: What and When

WHAT: Roads (excluding Routes 25 and 153) as marked on Road Map enclosure as being in the South Section and any roads plowed under the last contract and not listed on the map (A), Exchange roads listed in enclosure (B) and bus turnarounds (sample list on enclosure (E)). The Superintendent of MSAD #55 shall supply the Selectmen with a list of turnarounds at the beginning of each year and/or as turnarounds are changed.

WHEN: Your duties will commence July 1, 2020 and run for a three (3) year period with an option to renew for two (2) years on approval of both the Selectmen and the contractor (see paragraph 12). If contract is extended for one or two years a cost of living (COLA) increase will be considered.

2. INDEPENDENT CONTRACTOR

You and your agents and employees, during the performance of this contract, shall act in an independent capacity and not as officers or employees or agents of the Town. Any manpower needed to fulfill the obligations of this contract shall be furnished by you and you shall be solely responsible for complying with applicable state and federal laws including but not limited to Worker's Compensation law, employment security law and minimum wage law.

As an independent contractor, you are also responsible for maintaining your equipment in a safe, operable and legal condition, and insuring your employees meet all Federal and State guidelines.

3. MAINTENANCE REQUIREMENTS

A) You will commence plowing and sanding operations when snow on the pavement has reached a depth of one to two inches depending on conditions or when ice is forming on road surfaces. In case of a storm that may last all day only accumulating 2” or less, Roads must be attended to every 4 hours. Operations will continue until highways are cleared of snow to the outside shoulders. You will also provide plowing, sanding and salting as required to support emergency operations of the Fire Department and Rescue Unit.

B) You will follow the Maine Department of Transportation's guidelines for snow and ice control, except whenever possible sand should be used instead of salt or a sand and salt mixture should be used utilizing the smallest amount of salt possible while still maintaining safe driving conditions. This is necessary to protect drinking water sources
and reduce damage to roadside trees. Liquid calcium can be used when appropriate. Improper practices such as excessive speed of plows and disregard of mailboxes and traffic signs are unacceptable and must be controlled by you.

C) We agree to provide sufficient sand and salt for operations required by this agreement. The South Section is to put up sand and salt at the Maplewood Sand and Salt Shed (144 Maplewood Road). The contractor is responsible for arranging the procurement of the sand, hauling the sand, and supplying equipment and personnel to mix and load the sand and salt. The cost of the sand should be billed directly to the Town. The Town will supply the salt, delivered to the salt shed. The contractor should notify the town when a salt delivery is needed. You agree to pay particular attention to the sanding of hills, curves and intersections, and to apply extra sand and/or salt to such locations when necessary for safety of vehicular traffic. Roadways shall be maintained during a storm in a manner that will provide reasonable travelling conditions for a competent, prudent driver. Roads are to be sanded, salted and winged back within 24 hours after a storm. Snowbanks at intersections will be removed or relocated where they seriously interfere with the ability of drivers to see oncoming traffic.

D) You will remove compacted snow and ice from highways, insofar as possible, so that three and one-half feet of pavement will be exposed on each side of the centerline.

E) You will reimburse the Town for repair or replacement of guard rail, guard rail posts, signs, sign posts, guard posts which are damaged by your operations under this agreement if the Selectmen determine that such damage could have been reasonably avoided. You will reimburse residents for mail boxes damaged by your operations.

F) You will perform required duties for the Town before proceeding to private contracts unless authorized by Selectmen to do otherwise. Town-owned equipment and sand or salt will not be used for private property except for designated school bus turnarounds or unless specifically authorized by the Selectmen.

G) The Selectmen will set priorities for you to follow in maintaining primary and secondary roads.

H) You agree to maintain the equipment listed in enclosure (D) in a safe and good operable condition and make it available for use in fulfilling your responsibilities under this contract.

4. INSURANCE

You agree to maintain liability insurance in the amount of One Million ($1,000,000) for personal injury, death and property damage claims which may arise from snow removal or sanding operations under this contract. In addition, you will be required to provide a certificate of insurance or financial resources sufficient to satisfy the requirements of the Workmen's Compensation Act. The Town will be an additional insured.

5. BILLS AND CLAIMS

As an independent contractor, you are responsible for all bills for labor, material, equipment, fuel and other items, which are incurred in the performance of this contract. The Town will not pay such bills.
6. **BREACH OF CONTRACT**

If you fail to perform according to the terms of this contract at the time and in the manner specified that failure shall constitute a breach of contract. In the event of a breach, the Selectmen shall notify you both orally and in writing. You will then be required to perform within a reasonable time. "Reasonable time" may vary depending on the nature of the breach, road and weather conditions. If you still do not (for whatever reason) perform your duties in the time stated, the Town shall have the following options:

(A) **TERMINATE THIS CONTRACT:** We may terminate the contract by sending you a written notice, stating the reason for termination. You will be paid for all work that is satisfactorily done by that time, but the remainder of the money due you under this contract may be used to obtain another contractor to maintain the roads.

(B) **SUBSTITUTION:** We may hire a substitute contractor to plow and sand the roads for any period of time we consider necessary. This substitution will be paid for with money from the remainder of any money due to you (but unearned) under this contract. If the substitute contractor cost additional funding you will be responsible for the increased cost.

7. **INDEMNIFICATION**

You agree to hold the Town harmless from any claim for death, bodily injury, or property damage only to the extent of the limits of the liability insurance policy you are required to provide under paragraph 4 hereof.

A. In the event of contractor’s death or permanent disability then this contract will endure as written and pass on to his heirs or assigns until its termination or expiration.

8. **SUPERVISION AND CONTROL**

As an independent contractor, you have the right and duty to supervise and control your own employees, agents and equipment. The Selectmen or their designee (Road Commissioner) have the right to inspect your equipment and road maintenance operations, and notify you of any problems, errors or non-performance. The Municipal Officers may order that work be done in a manner satisfactory to them. Also see Paragraph 3. G).

9. **NOTICE AND CONTACT**

You agree to maintain, in good working order, a telephone connection with the capability of storing messages. Messages from emergency entities such as the State Police, County Sheriff, or the Fire Department or from the Road Commissioner will be acknowledged by you or your agent immediately or by a return call within 30 minutes. Failure to reply to such calls within 30 minutes may result in another person or company being contacted and authorized by the Selectmen or Road Commissioner to take
actions to alleviate a dangerous situation that would otherwise be your responsibility under this contract, and funds that would otherwise be due to you under this contract will be used to compensate that other person or company.

The following persons shall be available and authorized to accept notices (written or oral), calls and orders:

For the contractor:

Cell Number:

For the Town:

*Board of Selectmen or its Clerk*
*Parsonsfield Town Office*
*634 North Road*
*Parsonsfield, Maine 04047*
*625-4558*

10. PAYMENT SCHEDULE

The Town, having the right to accept or reject any or all bids at its discretion will pay said contractor

1\textsuperscript{st} year
2\textsuperscript{nd} year
3\textsuperscript{rd} year

for services rendered, in installments as follows:

20\% by the second Thursday in October of each year.
10\% by the second Thursday in December of each year.
20\% by the second Thursday in January of each year.
20\% by the second Thursday in February of each year.
10\% by the second Thursday in March of each year.
20\% by the second Thursday in April of each year.

This schedule of payments may be modified in the event of a breach of contract (see paragraph 6).

11. AMENDMENT, SEVERABILITY, JURISDICTION

This contract can be amended only by written consent of the Town and you. If any part of this contract is declared by a court to be void or unenforceable, the rest of the contract continues to be valid and effective. This contract is governed by the laws of the State of Maine.

12. TERM.

This agreement covers three (3) winters starting July 1, 2020 and terminating on
June 30, 2023. By mutual consent of Town's Selectmen and Contractor, it may be extended for two (2) additional winters provided both parties sign a written Agreement to Extend by May 31, 2023.

In witness thereof, the parties or their duly authorized agents execute this agreement on this

MAINE DEPARTMENT OF TRANSPORTATION
GUIDELINES FOR SNOW AND ICE CONTROL

PLOWING

A. The procedures to be followed in combating any storm will depend upon the
temperature, the condition of pavement, the nature of the precipitation and the forecast.
It is not the intent to completely detail the methods to be employed in combating every
possible condition. There are, however, some basic conditions, which will exist during
almost every storm, and the procedures to be followed under these conditions are,
outlined in the table at the end of this enclosure.

B. The winter maintenance of highways offers opportunities for causing damage to private
property and any damage caused in the performance of duties, should be reported to
the Selectmen within 24 hours of occurrence.

C. Widening should be done after the storm has abated and during daylight if possible.
Every effort should be made to do this work in one operation, thus avoiding the
repeated piling of windrows at driveways and intersections.

D. Care will be taken not to unnecessarily obstruct mailboxes, school entrances, or private
drives. Additionally, operators should use care to avoid damaging mailboxes when
plowing.

E. Snow will be removed from shoulders so that roadside ditches will be clear to handle
melt water and runoff. Graders are of particular use in this operation.

F. Openings may need to be made through the snow bank at low points to enable snow
water to drain off quickly at problem sites.

G. Snow should be pushed back with wings or blades as far as the equipment can reach
and still maintain a secure footing, except in built-up sections and areas with a narrow
right-of-way. This is essential for the storage of snow from successive snowfalls. Over
lawns at least one foot of snow should be left to prevent winterkill of grass.

H. All speed signs, stop signs, etc., should be cleared of snow and/or ice whenever
necessary.

I. High banks should be brought down with wings whenever possible to avoid snow fence
action which increases drifting on the road. High banks at intersections should be kept
low enough for traffic to see in all directions.

Sand to Salt Bucket Ratio: 25:1, 20:1, 17:1, 14:1

Example: If you put up a 3,000 cubic yard pile and mix salt-to-sand at 100 lbs salt to 1 cubic yard of sand, then you need 150 tons of salt.
MaineDOT Salt Application Quick-Reference Chart

("Double these rates for centerline applications")

<table>
<thead>
<tr>
<th>Pavement Temp. Range</th>
<th>Application Rate (#/LM)</th>
<th>Pre-wet Material</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>Above 32°</td>
<td>0 to 100</td>
<td>Salt Brine or Blend</td>
<td>A little salt goes a long way when temperatures are near freezing</td>
</tr>
<tr>
<td>25° to 32°</td>
<td>100 to 200</td>
<td>Salt Brine or Blend</td>
<td>Salt is very effective here. Pre-wetting with a blend will allow lower application rates.</td>
</tr>
<tr>
<td>20° to 25°</td>
<td>200 to 300</td>
<td>Salt Brine, Ice-B-Gone, or Blend</td>
<td>Salt effectiveness is dropping off in this range. A Blend or straight IBG will help.</td>
</tr>
<tr>
<td>15° to 20°</td>
<td>300 to 400</td>
<td>Ice-B-Gone or Blend</td>
<td>Pre-wetting is especially important. Your liquids will provide the extra boost needed.</td>
</tr>
<tr>
<td>15° or Below</td>
<td>Snow is usually dry and blowing in this range. If no ice or pack exists, plow only.</td>
<td>If necessary, Spot treat icy patches with abrasives. If glazing occurs on high-volume, high-speed, P1 corridors, sand will not last and higher salt applications, with Ice-B-Gone pre-wetting, will be necessary.</td>
<td></td>
</tr>
</tbody>
</table>

**General Notes:**

(1) Application rates should be on the lower end when temperatures are on the higher side of the range or remaining steady. Falling temperatures, and temperatures on the lower side of the range, will require applications on the higher side, and possibly in the next range if dropping rapidly.

(2) High-volume, Priority 1 corridors will often require an additional 50#/LM

(3) In any of the ranges, if the snow is dry and blowing off of the roadway, avoid application.

(4) Pre-wetting under wet storm conditions is not required. In cases where the only pre-wetting liquid available is a high-performance chemical (i.e. Ice-B-Gone), it is better to save those products for the drier and colder conditions.

Town of Parsonsfield
Winter Road Maintenance Contract

Minimum equipment required for each plowing section:

- One 1 ton dual wheel truck with minimum 9ft plow equipped with min. 2 yard sander
- Two min. Six wheel trucks equip with min. 10 ft RH (right hand) plows, min. 8' RH wings and 6 yard min. sanders
- One tandem rear Axel truck equipped with min. 10’ plow, min. 10’ RH wing and min. 10 yard sander
- One 4WD wheel loader min. 1.5 yard bucket for loading and stockpiling sand/salt
- It is permissible to replace one of the 6 wheel plow trucks with either a 4WD loader equipped with min. 9’ plow and 9’ min. RH wing and/or 4WD grader with moilboard and 9’ RH wing

This is not an opinion of what is needed; This is a list of what is expected (at a minimum) to be in service on all significant snow falls.

Each piece of equipment used on the roads shall be equipped with a two way radio at contractors expense which the operator shall use to contact and/or be contacted by contractor’s personnel, SAD 55 and/or town offices as circumstances require.

At request of town, contractor shall demonstrate to town’s satisfaction that all required equipment is on hand and operable no later than the first Monday in November.

All equipment shall be insured, registered and state inspected.
