INCRETIN MIMETIC MEDICATION LOG AND TREATMENT PLAN

The starting baseline dose is 2.5mg. Assess weekly.

- If side effects are unmanageable or undesired, decrease the next dose by 1-2 UNITS.
- If side effects are manageable and a dose increase is requested, the dose may be increased by 1 UNIT each visit.
- Assuming NO missed visits, NO side effects after a dose, and NO weight loss, the dose may increase by 1-2 units per visit.

[illegible]
