

Materials for Interleave Quilt as You Go

- 5 fat quarters of cotton quilting fabric – Select 4 fabrics that go well together for the top, and 1 backing fabric that can be whatever you want. There should be some contrast between the 4 top fabrics – if they all blend together too much the interleave design won't stand out. You should have enough left over from the top fabric fat quarters to make a binding. But you are welcome to provide extra fabric for a binding or to turn the finished quilt into a pillow. You will probably be doing the binding at home after the workshop.
- Fat quarter of cotton/polyester fusible batting
- Fat quarter of light weight fusible interfacing for foundation
- Gridded cutting mat, at least 18 inches long
- Ruler, at least 18 inches long (you need a ruler that will allow you to easily cut 18-in long and 1-in wide strips)

Select four fat quarters of four fabrics for the quilt top. They should be fabrics that go well together, but have some contrast between them as seen below.
