## WATER DISCONNECT REQUEST

If your property is completely destroyed and you do not intend to rebuild, or your new construction will take a few years to reach a point where water will be needed, LGWU recommends you request service to be suspended.

LGWU will pull your meter so it is not in the way of new construction and will reinstall when water is again needed during the construction process. There will be a \$100 fee to pull the meter and a \$100 fee to re-set the meter. During this time, the Base Meter Facility charge will accumulate @ \$79.59 per month (\$238.77 per quarter) and total accumulated amount will be due once meter is reset and water turned on.

If you do not rebuild within five (5) years, an impact fee, at the current rate at requested service continuation, will be due instead of the accumulated Base Meter Facility charge.
