

EDITOR'S PICK

An incredible non-surgical hair loss solution that takes seconds to apply and lasts for days. NOT A CHEMICAL DYE SPRAY! It's a patented, hair thickening product that fills in balding and thinning hair spots to an undetectable full head of hair look. Water proof, the fiber-based product adheres only to hair strands, not to the scalp and is 100% safe, natural and organic based.

By Suzanne Takowsky

I think most of us have had moments when we took a brush to our hair and felt a tad uneasy staring back at a big glob of hair resting on it. Or maybe jumped in the shower to wash our hair and did a double take when we saw a drain dish filled with a handful of our crowning glory. Sometimes hair loss is hereditary, hormonal or maybe it's the long, glorious hair extensions pulling it out by the roots or unknowingly caused by medications we take. Regardless the cause—hair loss is horrifying for men and women who are forced to look at balding patches when they stare in a mirror. Hair loss is embarrassing and options to hide it are few. It's either a hair transplant, a wig or hair piece, or that nasty color hair spray that looks like someone poured a can of paint on your head!

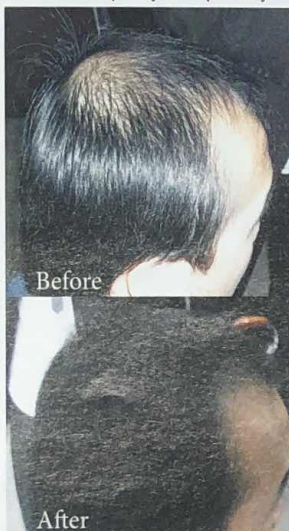

I'm one of those people who likes to share the "tricks of the trade" whether it's beauty, health or fitness—and my staff are the same way. Let's face it...why hoard information that might help another person feel good or look better? When one of my staff brought Hair Cubed to me as a client, I had no idea what it was. Certainly we get tons of products and services here at the magazine to profile, some people think some are good and others think they aren't. Useability, performance and success are individually-based. But when I was asked by the Hair Cubed owners to visit their salon and see

for myself the miracles it performs, it was too interesting to pass up—after all we live in a city so hair conscious people would rather wear a hat to bed than let anyone see them with bald spots.

Safe and Effective Doctor Recommended

The Hair Cubed Salon is located off Ventura Boulevard in Studio City. It's low-key, discrete (they cater to celebrities and VIPs around the world), the staff is friendly and knowledgeable when it comes to the ins and outs of hair loss damage control. I went to the salon thinking it was just another hair color spray product, and left two hours later with enough information to guide anyone who tells me they need help covering bald spots. Hair Cubed makes natural ingredient products, organically maintained for the health and wellness of those who use them. Hair Cubed products are so safe that several well-known hair transplant doctors specifically use them for patients who have recently had hair transplants. This is not an assembly-line corporation that makes a thousand cans a minute... this is a family-owned business concerned with quality not quantity.

Sometimes hair loss is hereditary, other times it is hormonal; maybe it's those long, glorious hair extensions pulling hair out by the roots or unknowingly caused by medications we have to take...

HAIR CUBED

Bio Hair Vitamins

Studies show that 40 million men and 21 million women suffer from hair loss. Hair Cubed hair thickening products are hair replication solutions giving the appearance of real hair. And check out their BIO HAIR VITAMINS. Made of vegetables and vegetable products, they are natural, organic and meet strict dietary guidelines; no meat, meat byproducts or preservatives. BioHair Capsules™ are a safe and healthy hair growth product that grows your hair back by reducing and reversing pattern baldness hair loss. BioHair Capsules™ repair weakened or damaged follicles with essential ingredients for new hair growth.

I left the salon with a bag of everything and I'm taking the hair vitamins. I put my hair through torture with all the coloring, blow-drying and ironing. A New Year...A New Healthy Head of Hair...YEAH! Check it out:
