

**Senior Software Developer**  
Financial Services  
Delaware, South Dakota, or New Jersey

Front-end PHP developer that enjoys writing good code, making things “go” and exploring new ways to solve users’ problems. You will be a part of a small team responsible for all aspects of the software development from coding to testing to launching.

**Job Responsibilities:**

- Write “clean”, well designed code
- Produce detailed specifications
- Troubleshoot, test and maintain the core product software/databases to ensure optimization and functionality
- Contribute in all phases of the development lifecycle
- Follow industry best practices
- Develop and deploy new features to facilitate related procedures and tools, if necessary

**Requirements:**

- Proven software development experience in PHP
- Demonstrable knowledge of web technologies including HTML, CSS, Java Script, AJAX
- Good knowledge of relational databases, version control tools, agile project management and developing web services. Python, MySQL a plus.
- Passion for best design and coding practices and a desire to develop software that works well for both the engineers and the users
- Comfortable working collaboratively and independently
- BS/MS degree in Computer Science, Engineering or a related subject
