Tips to Staying Sane During COVID:

- There are multiple studies showing that those who practice some form of meditation tend to not only be more productive and motivated, but also hold a more positive outlook towards life. Meditation can be practiced in any way that fits best for you. All that you need is a quiet place with natural light (or no light, depending on what you prefer), somewhere soft to sit or lay, and just a few minutes to yourself. If you prefer a more guided experience, I highly recommend the CALM app. If the app isn't your thing, there are also a bunch of Youtube videos out there that you may find helpful.
