

TRANSFER PUMPS

DIESEL AND JET FUEL PUMP SERIES

NEED TO TRANSFER DIESEL OR JET FUEL?

Our transfer pumps provide engineered excellence in a fully integrated system that is designed specifically to meet your pumping needs.

Available in 100 or 150 gpm models, each pump option is housed on a skid for easy shipping and deployment.

100 GPM MODEL (378 LPM)

- Great for simple transfer of fuel between two points
- Diesel engine with optional electric start
- Standard recoil start
- Self-priming centrifugal 2" pump
- Inlet and outlet ball valves, pressure relief valve, camlock fittings and roll cage around pump and engine
- 27" x 25" x 27" (68.5 cm x 63.5 cm x 68.5 cm)
- 165 lbs. (75 kg)

150 GPM MODEL (567 LPM)

- Perfect for high pressure applications or pumping over long distances
- Diesel engine with optional electric start
- Standard recoil start
- Self-priming centrifugal 2" pump
- Camlock fittings and roll cage around pump and engine
- 28" x 32" x 31.5" (71 cm x 81 cm x 80 cm)
- 215 lbs. (97.5 kg.)

* Electric start option recommended for cold weather usage.
