

BOIL ADVISORY

**TOWN OF IOWA WATER SYSTEM
PWS ID# 1019026**

January 7, 2021

For Immediate Release

The Town of Iowa Water system has experienced problems with our water supply system.

The water tower was inspected today. It is required to drain the tower for the inspection.

Because of this, the water produced by our water supply system is of questionable microbiological quality.

Therefore, as a precaution, the Town of Iowa Water System is issuing a BOIL ADVISORY effective immediately for certain areas of the water system. These areas include:

Gravity Drainage area on W. Miller Street
N. Thomson Avenue
Iowa High School and Middle School

This BOIL ADVISORY is to remain in effect until rescinded by the Water System.

It is recommended that consumers disinfect their water before consuming it (including fountain drinks), making ice, brushing teeth, or using it for food preparation or rinsing of foods by the following means:

Boil water for one (1) full minute in a clean container. The one minute starts after the water has been brought to a rolling boil. (The flat taste can be eliminated by shaking the water in a clean bottle, pouring it from one clean container to another, or by adding a small pinch of salt to each quart of water that is boiled.)

Again, please be sure to disinfect your own water prior to consumption until you have been advised otherwise.

The Town of Iowa Water System will rescind this Boil Advisory upon notification from the Louisiana Department of Health and Hospitals- Office of Public Health that additional water samples collected from our water supply system have shown our water to be safe.
