March 2 is National Read Across America Day, and the birthday of Theodore Seuss Geisel, an American author who, under the pen name Dr. Seuss, wrote and illustrated some of the world's most iconic children's books. Geisel's first book, "And to Think That I Saw It on Mulberry Street," came in 1937. "Green Eggs and Ham," "Horton Hears a Who," and "The Cat in the Hat" would soon follow. He passed away in 1991 at the age of 87.

## Upcoming Movie Releases

...and more!

## Upcoming Adult Fiction

*The Boy From the Woods - Harlan Coben*

Thirty years ago, Wilde was found as a boy living feral in the woods, with no memory of his past. Now an adult, he still doesn't know where he comes from, and another child has gone missing.

No one seems to take Naomi Pine's disappearance seriously, not even her father-with one exception. Hester Crimstein, a television criminal attorney, knows through her grandson that Naomi was relentlessly bullied at school. Hester asks Wilde-with whom she shares a tragic connection-to use his unique skills to help find Naomi.

Wilde can't ignore an outcast in trouble, but in order to find Naomi he must venture back into the community where he has never fit in, a place where the powerful are protected even when they harbor secrets that could destroy the lives of millions . . . secrets that Wilde must uncover before it's too late.

## Upcoming Adult Non-Fiction

*Volume Control* - David Owen

Our sense of hearing makes it easy to connect with the world and the people around us. The human system for processing sound is a biological marvel, an intricate assembly of delicate membranes, bones, receptor cells, and neurons. Yet many people take their ears for granted, abusing them with loud restaurants, rock concerts, and Q-tips. And then, eventually, most of us start to go deaf.

Millions of Americans suffer from hearing loss. Faced with the cost and stigma of hearing aids, the natural human tendency is to do nothing and hope for the best, usually while pretending that nothing is wrong. In *Volume Control*, David Owen argues this inaction comes with a huge social cost. He demystifies the science of hearing while encouraging readers to get the treatment they need for hearing loss and protect the hearing they still have.

Hearing aids are rapidly improving and becoming more versatile. Inexpensive high-tech substitutes are increasingly available, making it possible for more of us to boost our weakening ears without bankrupting ourselves. Relatively soon, physicians may be able to reverse losses that have always been considered irreversible. Even the insistent buzz of tinnitus may soon yield to relatively simple treatments and techniques. With wit and clarity, Owen explores the incredible possibilities of technologically assisted hearing. And he proves that ears, whether they're working or not, are endlessly interesting.

## Upcoming Young Adult Fiction

*A Constellation of Roses* - Miranda Asebedo

Ever since her troubled mother abandoned her, Trix McCabe has preferred to stay on the move.

But when she lands with her long-lost relatives, she finds out that the McCabe women have talents like her own that defy explanation: pies that cure all ills, palm-reading that never misses the mark, knowledge of secrets that have never been told.

Before long, Trix feels like she might finally have found somewhere she belongs. But when her past comes back to haunt her, she'll have to decide whether to take a chance on this new life . . . or keep running from the one she's always known.
