

STW Selection Guide

At STW we pride ourselves on delivering a quality product, meeting deadlines and ensuring the happiness of our customers. This selection book covers our “standard” offerings, other options are available, but will be evaluated on a case by case basis. We specialize in Custom Modern Frameless Cabinets, some would also describe them as Full Overlay cabinets. We use all domestically produced $\frac{3}{4}$ ” UV clear coated Maple plywood for our cabinet box construction. Drawer boxes are constructed of a $\frac{1}{2}$ ” UV clear coated Baltic Birch plywood. We perform all design, construction, finishing and installation, in house, to control quality and scheduling. Some of our work...

It all starts with the foundation

At STW we integrate the EZ-Level System into all cabinets that will have Granite\Quartz Countertops. As you know, these tops are extremely heavy! Most installers will use wood shims to level their base cabinets. The problem with using wood shims is that they expand and contract and eventually move out from underneath the cabinets, leaving your heavy, expensive countertops with no direct support to the floor. This can lead to cracked backsplashes and cracked countertops, which is expensive to fix to say the least. Click the link below for more information.

<https://www.ez-level.com/>

Door Options

We offer stain grade and paint grade options. Our paint grade doors are constructed out of a CNC milled solid piece of HDF which eliminates all seams and provides a very smooth finish at an affordable cost. Stain grade shaker & slab doors are milled in house. Mitered and Raised panel doors are ordered from TaylorCraft doors in Taylor, TX. TaylorCraft options: <https://taylorcraftdoor.com/>

Paint Grade Shaker Style \$10 sq/ft

Paint Grade Beaded Shaker \$12 sq/ft

Stain Grade Shaker \$30 sq/ft

Grain Matched Slab \$ depends on wood

Drawer and Interior Hardware Options

We offer two drawer selections, both constructed with $\frac{1}{2}$ " UV Baltic Birch plywood with $\frac{1}{4}$ " plywood bottom, oversized drawers have $\frac{1}{2}$ " plywood bottoms. All drawers are made with $\frac{1}{2}$ " UV Baltic Birch Plywood.

Our soft close and normal close slides are both full extension. Both slide options are rated for 100 lbs.

Standard Drawer \$30 each

Dovetail Drawer \$75 Each

Soft Close Undermount \$25 each

Normal Close Side Mount \$6 each

Soft Close Hinge \$6 each

Normal Close Hinge \$2.50 each

Finishing Options

South Texas Woodworks offers one paint and one stain selection per job. More than one color can be added for an additional charge. We do have stain sample boards in house, and we ask that you provide your paint SKU number to be matched as we use only lacquer-based paints. Laminate finishes are also available in various colors. See <https://www.premiereurocase.com/> for options.
