

**PennHIP Report**

Referring Veterinarian: Dr John Lawton	Clinic Name: Overton Veterinary Services, LLC
Email: j_lawton@yahoo.com	Clinic Address: 75348 Road 440 Overton, NE 68863
	Phone: (308) 324-7202
	Fax:(308) 324-7203

**Patient Information**

Client: Meyers, Brittany	Tattoo Num:
Patient Name: Serendipity Striking Bow N Arrow	Patient ID: 28856
Reg. Name: Serendipity Striking Bow N Arrow	Registration Num: GLN05434497
PennHIP Num: 173622	Microchip Num: 985141004311933 and 9330003205410
Species: Canine	Breed: LABRADOODLE
Date of Birth: 28 Apr 2021	Age: 13 months
Sex: Male	Weight: 37.6 lbs/17.1 kgs
Date of Study: 17 May 2022	Date Submitted: 17 May 2022
Date of Report: 18 May 2022	

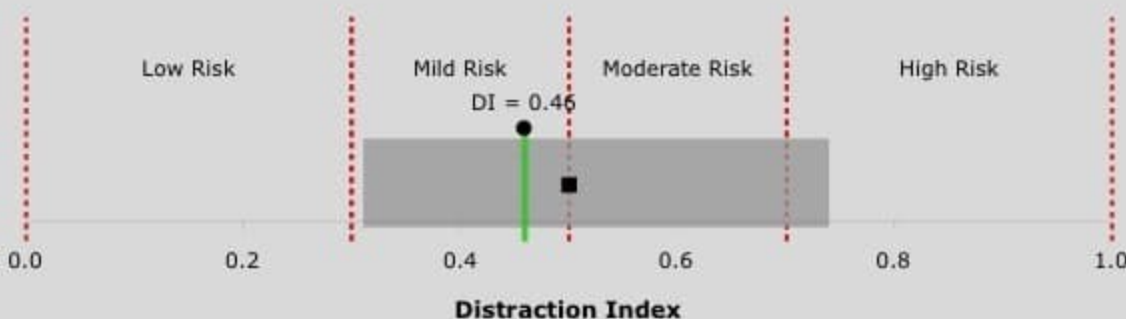

**Findings**

Distraction Index (DI): Right DI = 0.44, Left DI = 0.46.  
**Osteoarthritis (OA): No radiographic evidence of OA for either hip.**  
 Cavitation/Other Findings: No cavitation present.

**Interpretation**

Distraction Index (DI): The laxity ranking is based on the hip with the greater laxity (larger DI). In this case the DI used is 0.46.  
 OA Risk Category: The DI is between 0.31 and 0.49. This patient is at mild risk for hip OA.  
 Distraction Index Chart:

**LABRADOODLE**

**BREED STATISTICS:** This interpretation is based on a cross-section of 10824 canine patients of the LABRADOODLE breed in the AIS PennHIP database. The gray strip represents the central 90% range of DIs (0.31 - 0.74) for the breed. The breed average DI is 0.50 (solid square). The patient DI is the solid circle (0.46).

**SUMMARY:** The degree of laxity (DI = 0.46) falls within the central 90% range of DIs for the breed. This amount of hip laxity places the hip at a mild risk to develop hip OA. **No radiographic evidence of OA for either hip.**
