Designers Choice takes pride in the quality of our wood doors. Your kitchen is the focal point and the true heart of your home. It is a place where family and friends gather to share a quiet moment or good food. We understand the importance of this tradition by selecting only the best hardwoods produced in America. We take pride in offering an economical and affordable product that inspires the tradition of old world craftsmanship.

We produce two different types of 3/4" wood doors, mortise and tenon or mitered. We have over twenty-five different rail profiles and five different raised center panel profiles. We have both beaded and non-beaded flat center panels, along with a 3/4 slab door with square edges fully covered in veneer. The primary wood species we offer are hard maple, cherry and red oak. These three species dominate over 90% of the U.S. market. They all offer subtle tones that complement the large variety of finishes that Designers Choice Cabinetry offers from light to dark stains as well as several painted colors, all with optional glaze accents. The result is impressive. Doors that are built to last. All backed by our limited lifetime warranty.
