SunSmile Fruit and Veggie Rinse

Be Confident about what you eat ... Clean! Safe!

Good News: People are eating more fruits and vegetables than ever!
Bad News: We're thereby eating more insecticides--toxic substances!

National Academy of Science (NAS) says
The real concern is:

- The *cumulative effect* of herbicide and insecticide toxic substances on all ages.
- This cumulative effect is serious, but especially to children since they pass through critical phases of development.
- The fruits with highest pesticide levels are **apples, peaches, cranberries, raspberries, strawberries and Mexico cantaloupes**. The vegetables of greatest concern are **corn, celery, lettuce, and spinach**.
- Other concerns: There is an even higher level of carcinogenic sprays used in some countries that are not under the control of the EPA.
- In addition there are various germs and parasites that exist on these fruits that we are unable to wash away. There is a considerable amount of illness transmitted this way.

Solution: SUNSMILE FRUIT AND VEGETABLE RINSE

This breakthrough product is without equal. Naturally derived from coconut oil and corn starch, and powerfully formulated with herbal ingredients to:

- Clean gently all **fruits, veggies, grains, legumes, and meats** of external pesticides, harmful bacteria (salmonella, E.Coli), parasites, worms, larvae, fungus, and even waxy coatings.

Easy to Use: 1 capful (1g. bottle) to 1 gal. water. Dip in diluted solution 1 min. Pat dry or use out of solution. Waxy coatings, dip in diluted solution for 5 min, air/wipe dry. No need to rinse off.

- Dissolves the natural waxy protective coatings on bugs, causing their death, making it a **natural herbicide/pesticide**.
- **Discourages insects, worms in garden and trees** 2 capfuls *F&VRinse* + 2 caps of *SuperClean*/gal.

- Saves **produce \$\$**. Clean, safe food stays fresh longer. Slows dehydration. Washes away **sprouts'** mold and bacteria, extends life.
- Disinfects **water for drinking** (1-2 drops, short-term only), cooking, bathing, and washing dishes (1 capful/gallon.) Tests verify that 5-ml of rinse/1 gal. of water will eliminate or destroy 99% of E. Coli, salmonella, and other organisms.
- Provides protection against **bacteria, virus, fungus, and parasites** (including Giardia and amoebas in water). Use in dishwasher to stop germs when colds are around. Sterilizes **cuts, scrapes or burns**.
- Fights **Athlete's Foot** (which is Candida on the feet) **Ring Worm, Contact Dermatitis, Eczema, Impetigo, Psoriasis, Nail Fungus**. If any area turns white, it indicates Candida, fungus, infection or mold.
- Works effectively on **warts, poison oak, poison ivy, candle wax and teeth stains**.
- Discourages **parasites—internal cleansing--3-4 drops in water or capsule for 3 days, then repeat in a week**. Drink *Regular Fortune Delight*--clean bowels with *SunBars*.
- Helps remove **lice, fleas and dust mites**--one capful mixed with 4 oz. Shampoo.
- Sanitizes bathroom sinks, toilets and showers; can be mixed with *SuperClean* for double duty!
- Extends life of **flowers** --1 to 2 drops in water, change every 3-4 days & cut stems.

Comparison by University of Southern CA at Davis:
Kills bacteria--SunSmile had no return of bacteria in tests. Compared to Silex, Roural, and Scholar used 10x the strength to stop bacteria; all those had bacteria come back 100-1,000 X. Wow! Thank you Sunrider! **Use to clean up your life!**

Safe & Effective!

Why We Need Sunrider's Fruit and Vegetable Rinse

Fruit and Vegetable Rinse approved for cleaning

fruit: While on our Sunrider Cruise to the Caribbean a couple of couple of years ago, a Distributor, who is a peach grower in California, shared his experience with **Sunrider's Fruit and Vegetable Rinse**.

Fresh-picked fruit is immediately put into a machine called a hydrocooler, which cools the fruit very quickly. It also contains chlorine bleach which supposedly deals with any bugs or fungus that is on the fruit. The bleach does not work particularly well and also introduces carcinogenic and hormone-mimicking chemicals into the fruit and the environment. The Distributor approached Dr. Chen and asked if he thought the **Fruit and Vegetable Rinse** might be of some use in the process and Dr. Chen replied that it would work exceptionally well.

The Distributor took it to the University of California and had it tested. They were so impressed with the results that they convinced the Government of California to subsidize fruit growers who wished to use **Fruit and Vegetable Rinse** instead of the bleach. *Tricia Holder*

Fungus on the nails: Yes, the Fruit and Veggie Rinse is fabulous for nail fungus! I personally have acrylic or some kind of nails on top of my own. Sometimes before **Fruit and Veggie Rinse**, I would get fungus on my nails, especially if there was a little crack or hole to get water in between the nail and fill. Now that I use **F & V Rinse** in my kitchen to wash veggies, etc., I rarely ever get fungus under my nails any more. And if I do, while maybe traveling, I just put it on straight on the fungus. It kills it better than what they use in the salon. In fact, my nail technician tells everyone about it to use to kill fungus at home on their nails.

Also, if someone has it on their toes, they can soak their feet in a solution of **F & V Rinse** to help kill it. And I would put it on straight and let it dry on the feet. It is great for Athletes Feet, or Candida, on the feet. I use it all the time, once a week, to keep the fungus off the feet, which is a natural occurrence with wearing shoes. *Sharon Farnsworth*

EXPERIENCES WITH FRUIT AND VEGETABLE RINSE

A few days ago, my father was out working on the compressor of a cooling unit. He was lying on the ground and applying a cleaning agent to the components of the compressor to clean them. He wasn't aware that he was laying on a slight incline that allowed the chemical concoction to slowly make its way back to his arm to start "cleaning" the flesh from his arm. He hurried to get his shirt off to rinse his arm and shoulder. Dad said the chemical had a residue and a staying power that was a challenge to wash away. It took some time to remove it.

What was left was a two by four-inch area that he described as "hamburger meat" - brilliant, bright red flesh. Mom was pretty horrified when she saw it and thought the emergency room was in order. Dad just asked her to get "some of that stuff" she uses. That "stuff" is Sunrider's Fruit and Vegetable Rinse, which she applied in an undiluted stream directly over the tissue.

When they relayed this experience to me, it was day four since the chemical accident. They had continued to apply the Fruit and Vegetable Rinse to the area twice a day and left it unbandaged. They were astounded at the rate of healing, the lack of infection and the assistance to the new tissue that this Sunrider product provided in Dad's healing process. They described it as "remarkable" (which it truly is).

About five years ago, I had my own experience with its unique combination of concentrated, naturally derived ingredients. My burn was from a small flame, which went through clothing to my lower right leg. When I flung back the material over my leg, some of my skin went with it. At the time, for some reason, I did nothing to it. Later that day, I felt great pain right to the bone. It was a third degree burn and had become infected. Frankly, I thought I might be in a bit of trouble with my leg by that time. I had recently started eating Sunrider foods and had changed my household products to Sunrider's after learning about them. I remembered the Fruit and Vegetable Rinse and applied it directly to the area and left it open to heal.

When I awoke the next day I was amazed. The tissue had improved quite drastically and that intense pain to the bone was completely gone. From that point on, I experienced a rapid, thorough and infection-free regeneration of the skin and deep tissue. Today, you cannot even see scarring.

The same for our Christina, when she was a toddler and walked into an old heater before we could get to her. I felt horrible that she had to experience this. It was a great relief, however, to know and trust that she would have a complete and rapid healing of her little

fingers, hand and arm with the Fruit and Vegetable Rinse, which she did. And again, with no scarring.

The Fruit and Vegetable Rinse is, quite literally, our "medicine cabinet". Not only is it extraordinary for its suggested use and more economical than what is offered at any market or health food store, it offers so much more than deeply cleaned fruits and vegetables that stay fresher longer.

Out of curiosity, two nursing students in our group tested this product, at different times. In both instances, the Fruit and Vegetable Rinse rated more effective for every bacteria test when it was compared to what they were using in the hospital laboratories!

The Fruit and Vegetable Rinse is what I reach for with every cut or scrape or bite that an active, almost-four-year-old can get into. It is marvelous to have something that is not petroleum based or a blend of chemicals with a variety of side effects that can build up in Christina's body (or ours). Starting when Christina's umbilical cord fell off, this is what I used. Her pediatrician remarked about how clean and thorough it was healing. It had fallen off only the day before he saw her!

My Mom had experienced "shingles" at one point a few years ago. She used the Fruit and Vegetable Rinse over the area. It sped up the healing process for her. When her doctor saw how clean the area was, he was quite surprised and encouraged her to keep using it.

The Fruit and Vegetable Rinse can also be used to safely clean pests from your pet's fur. It can be used for lice instead of the toxic chemicals that are normally recommended for this. (I have heard that it is rapidly effective when more than one dose of these types of products are used.) It can also be used in an atomizer and is much more effective than other similar products. It is highly effective for "Montezuma's Revenge" when traveling. You can ingest just a few drops in your Calli or Fortune Delight. One woman in our group put three drops on her sandwiches and salads before she ate them and never experienced the "Revenge". She remarked that every trip before she started doing this she had gotten sick. The Fruit and Vegetable Rinse is extremely effective for Athlete's Foot, funguses of the finger and toenails and even yeast infections. All of this from one bottle and no harmful side effects!

We have both the 16-ounce bottle and the 1-ounce trial size (to refill from the larger bottle) on hand, at all times. There is no product equal to it.

Here's to your health, inside and out!

Tina Thornton

SunSmile SuperClean

Two bottles do it all!!

SuperClean – Household:

Perfect for the multitude of household cleaning chores: windows, bathrooms, carpet, walls & floors, even the car and boat!

Safety:

Replaces all toxic and often harmful cleaning solutions we keep under the sink. So gentle on our hands! Our product being pH balanced, and slightly acidic like our skin, is a pure joy to use. Non-abrasive and non-corrosive! Won't remove wax (floors or cars) nor damage paint. No need to wear gloves!

200% Savings -- Cost Effective:

SIMPLY BEYOND COMPARE

*SuperClean's powerfully concentrated, exclusive formula is the best cleaning value on the market. It is so concentrated; you use a fraction of the amount recommended by comparison products and **SuperClean** does the job of a multitude of other cleaners.*

Pour one capful of *SuperClean* in a spray bottle (available from Sunrider) and fill rest with water. Use for all your cleaning needs! That's under \$.25 cents for a spray bottle of cleaner. How much does Windex, 409, Fantastic cost? That is an approximate **200% savings \$\$\$!**

- **Dishwasher** – use scant 1 tsp./load
- **Stain remover** –Pre-treat 3-10 min. Rub and rinse with water. Use full-strength if needed.
- **Carpets** -- shampoos & cleans spots without sticky residue to attract dirt back like other carpet cleaners. 1 tsp/spray bottle.

Deodorize & Disinfect:

For an even more powerful combination (anti-mold, anti-bacterial, anti-fungal) just add a squirt of *SunSmile Fruit and Veggie Rinse* to your *SuperClean* spray bottle. (1 capful to a gal. of *SuperClean* and water--its sanitizing rinse effectiveness lasts about 1 hr).

Dr. Chen developed SuperClean to clean the manufacturing equipment & machines at

Sunrider Because Sunrider owns its own manufacturing complex - Sunrider controls the quality of its products from design, raw materials, formulation and production through packaging. We can count on Sunrider quality.

SuperClean – Laundry:

The clean clothes tell the difference! It's easy. It's real. Pour on stains, leave for a few minutes, and wash! All you need!

Cost Effective:

- Very concentrated, 63 loads
- 1/2 capful / regular load laundry

Multiple Benefits:

- No residue to build up in clothes and washing machine-both wear longer
- Color protected and brightened
- No fillers and thickeners to make product appear concentrated
- Natural oils and extracts deodorize leaving a clean fresh scent rather than synthetic fragrances often harsh and irritating
- Slightly acidic pH rather than alkaline which can decrease life of fabrics
- Not petroleum based, thus reducing irritations and allergic reactions
- Phosphate-free, biodegradable, friendly to the environment

Stains: Pre-treat 5 min. Rub and wash. Add safe *SunBright Bleach* to brighten and whiten fabrics.

SuperClean & SunBright Bleach Boat Cleaning Experience

Hello Sunriders,

WOW, I am always amazed at how wonderful our Sunrider products are! Mike & I have just experienced another Sunrider wonder!

As most of you know, we live on a lake. Well, it was time to take the boat out, and put it in storage. The past several weeks, we have been busy and have not had time to enjoy the boat, so when we pulled her out of the water, we were sick!! Our beautiful boat looked like the Lock Ness monster. Mildew, slime, leaves, spider webs, and fish grub. My plans for the rest of the day were shot, or so I thought, when I knew we had to take care of the boat.

Most of the products out there for cleaning boats are harsh, expensive, and actually damage the cushions. Most are so full of bleach that they destroy the threads, and the cushions fall apart. We usually use only *SuperClean*, but I feared this much tougher job. So I decided to try our safe *SunBright bleach*. We were a bit worried because our boat is Dark Burgundy and Hunter green. Colors that like to bleed!!! Well, we tried a spot and could not believe how fast it was cleaning off. We tried a spot on the carpet, same thing. WOW, we started spraying one section at a time, and before we could finish the next section, the other would be amazingly clean. Granted, we did have to do a bit of scrubbing in places, but for the most part it was painless. We then power-washed it down and she looks like a new boat!

Here are more amazing things: It only took us a little over one hour, from start to finish. We had no need for gloves, or masks. We did not ruin any of our clothes. It was safe to run off onto the cement and into the grass. Our hands felt silkily soft and clean (no bleach smell). It cost us less than \$10. The job was effortless, which made Mike & me happy, leaving us time and energy for relaxing in the Hot tub, and other "things"! AND WE GOT PAID TO DO IT!!!!!! ...I am talking about cleaning the boat!! HA! Sunrider you are SIMPLY THE BEST!! We love our Sunrider life!! We are blessed, and life is good!

Here is our Sunrider boat cleaning formula:

1- 4 fl. oz bottle of *Sunrider SunBright Bleach*

3-4 oz of *Sunrider SuperClean* water

We used 2- 32 oz spray bottles from Sunrider. Filled each with 2 oz of *SunBright & SuperClean*, filled the rest with water. Sprayed on cushions, wiped with damp cloths, used soft brush on tougher spots, power-washed & rinsed, and Voila!! We even sprayed down the life jacket, and boat containers, and still have left-over formula!

Happy Fall cleaning to all!

Mike & Linda Sinclair
Greenville, Michigan
