

Freestyle class rules;

- Any safe air gun is allowed that shoots a diabolo shaped pellet under 20 fpe. This is to prevent undue target damage.
- Any scope is allowed
- Rangefinders are allowed
- Any shooting position is allowed
- Bipods, tripods, shooting sticks or other aides (seating included) are allowed. Note that if you want to use it, you have to carry it from lane to lane so take that into consideration.
- So long as the equipment is safe, the shooter utilizes safe shooting practices, and does not jeopardize any other shooter or damage any part of the shooting venue, just about anything goes.
- Remember this is a game. The intent of this class is to give folks a place to shoot while they learn the game (and then move over to a competitive class of their choice), have a physical imparity that doesn't allow them to get into some of the shooting positions of the other classes, or whose eyesight prevents them from seeing the targets clearly enough to judge distance without the aid of an external devise (laser rangefinder). It is not our desire to see this grow into an equipment race. Please play the game in the spirit for which it was intended, and have fun doing so.
