## Beautiful Stars with Unforgettable Hair

These stars are perfect examples of celebrities who use extensions to keep up their glam look. The secrets behind those gorgeous locks are high-quality human hair, precise placement, color matching AND something many extensions are lacking—a great cut! These stars know what gives them a beautiful, natural look as they rock the Red Carpet. Hair extension can offer a new look in hours, more hair volume and beautiful highlights.

### Micro Cylinders Glued • Braided Woven • Clip-ins

My personal favorite clip-ins are easiest on hair, non-damaging and preserve the integrity of hair while offering the ability to add length, volume and change color. Micro Cylinders are least damaging of the standard version of extensions. Older methods such as glue, are harsh on hair and Wefts can sometimes be too heavy. New and improved hair extension choices maintain the integrity of your hair, while achieving a healthy and natural look.

Kourtney Kardashian

Sarah Jessica Parker

Celebrities surprise us by changing hairstyles, color and hair length in a matter of hours. Hair lengthening is created with extensions and the help of a talented stylist. But it's not all glamour because **BAD EXTENSIONS** can interfere with the integrity of natural hair. Extensions require care by braiding before bed, using a loop brush made for extensions and by washing hair with cool water, a gentle shampoo and light conditioner to protect the extension bonding from breaking down and keep new tresses tangle free. Costs range depending on the quality and amount of hair used, and you must incorporate the cost of "maintenance" upkeep every 6-8 weeks. With quality extensions and a caring stylist, you can enjoy different new looks for years to come.

Many reasons exist why extensions do not work. Poor quality hair and hair is bleached and recolored damaging the integrity of the hair cuticle leaving it coarse, unmanageable and unable to hold onto pigment (a cause of discoloration). All are a BAD extension give away. A proper cut is vital to blend the length of extensions into natural hair for an effortless flow. Proper maintenance and care is essential when

when  
**BAD EXTENSIONS**  
happen to  
**GOOD PEOPLE**

extensions grow out as they can cause dreading and balding. I recommend individual strands verses wefts for a more accurate placement and customized look. While synthetic hair is plentiful, human hair is superior in its viability; synthetic hair cannot typically be heated, so styling is limited. If you want extensions, but have a busy life, speak to a qualified extension stylist about low maintenance options.

With extensive training under Wella Color, Tony & Guy, and Paul Mitchell, Marnie styles numerous celebrities and her natural looking hair extensions are seen on Runways and Red Carpet VIPs from Hollywood to Paris.
