

Bak-Pak Eco System
Aqua-Link ADP Stock # 2060

Main unit 13" long x 4⁵/₈" wide" x 8¹/₂" tall

With Protein Skimmer, 15" tall

Requires 4³/₄" wall clearance

*Water pump (Not Included)

Fits aquarium frames 1¹/₄" to 1⁵/₈" wide

Holds 1.42 gallons

Unit; Weight - Empty - 6lbs.3 oz.

- Operational -18lbs. 4 oz.

- Shipping 8 lbs

Bak-Pak Eco System used as a compact marine unit that hangs on an aquarium upper frame because aquarium set up does not provide space available for a conventional Wet dry Trickle filter sump. This unit is an excellent choice for low populated aquariums, or systems that require slower water flow.

Provides for;

- Biological Digestion
 - Aerobic (Bio-media cylinder)
 - Anaerobic (Choice)
- Foam fractionation (Venturi)
- Mechanical filtration
- Ion Exchange Capabilities

Features;

- Top accessibility for ease of maintenance.
- Secure unit leveling mounts (fully adjustable)
- Oxygen diffuser.
- Smooth flow effluent water return.

*Shipping container 16" x 10" x 8"
