SACRED GEOMETRY AND LEYLINES OF THE HOUSE OF YHVH

The illustration below is an approximate depiction of the geometry directly corresponding to the geography of the Holy Land with the 3 main 'Arks' highlighted in this study. The 3 'Arks' that correlate to the 3 geographic points are Mt. Ararat, the Temple Mount and the purported real site of Mt. Sinai. Of these 3 locations, 2 of the are without dispute. Nonetheless, the correlation of the 3 are in approximate phi ratio proportions in terms of distance, geography and geometry to each other and perhaps 'prophetic time'. The following will attempt to explain the construct of the sacred ley-lines. The map will be 'upside-down' or at a 180° rotation for perspective given the illustration to show that Mt. Calvary precisely in association with the House of YHVH and Mt. Sinai compose a 'Capstone' of a geometric 'pyramid'. The configuration starts with a diagonal line that spans the circumference of the 2 sites, Mt. Ararat and Mt. Sinai. These 2 interlocking circles produce a Vesica Piscis. Perhaps this area within the Vesica could have been the true location of the Garden of Eden where the Tree of Life and the Tree of the Knowledge of Good and Evil was situated 'in the midst'. These 2 points within the circle produce a 'triangle'. An exact mirror to this triangle produces a square that depicts the phi ratio association of the 3 'Arks'. The focal point or center of the circle center line bisects Mt. Calvary with the line of latitude from the circle's radius. A mirror triangle of the same dimension construes the 'pyramid' with Mt. Ararat at the base longitude. The span from Mt. Sinai to the Temple Mount-Mt. Calvary configures the 'Capstone'. This geographic and geometric depiction of the 'pyramid' is in approximate phi ratio proportions as the 3 geographic locations of the 'Arks' are also. The 2nd circle approximates the circumference of the 'pyramid'. If the 'pyramid' triangle is inverted and the base is set to the phi ratio dimension corresponding to the Temple Mount, the outcome will be a 'Star of David' or Seal of Solomon.

This series of studies and illustration suggests that the property of the phi ratio is the divine 'key' that unlocks various geographic and geometric configurations from where certain locations where sacred sites are associated with are found in the Holy Land. If YHVH had a hand in creating and/or rehashing the Earth after the Flood, His divine presence would have resonated His creative properties even upon the very topography of the Earth to the degree that phi ratio proportions would be factored. These series of illustration are but 1 attempt in ascertaining them as they pertain the geography of the 3 'Arks of Deliverance' in the Holy Land.
