

Happy New Year fellow Yachtsmen!

We wish you all enjoyable boating adventures this Summer Season. We are also bringing you new ways to improve your boating experience at Midway Marina.

New Alongside Finger Piers:

Our eight "Back-in" Slips along the bulkhead have become silted in so badly it has rendered them almost useless. As a result, we have decided to add finger piers to enable dockage bow in. There will be a finger on one side of each boat and a stern and spring pile on the other preventing the boats from bumping each other upon docking. The drive-in slips will be much easier to navigate than the old back in maneuvers and your cockpit will then face the river view. These slips will also be suitable for sailboats. A lot of benefits to this improvement, perhaps some of you docking at other locations in the marina may want to move closer to parking and our picnic area and shelter

Yard Expansion:

Many of you have probably noticed the yard expansion portion has been completed. In the nick of time as we needed the additional space for many new customers this year. Thank you all for your new referrals. On the other side of the tracks the landscaping should commence shortly and be completed this summer.

Employment:

There are openings here for detailing boats and general yard work as well as weekend dock attendant. For the right person, this could be a great opportunity!

Spring commissioning:

Your complimentary Spring Commissioning Checklist is enclosed. Note the two low labor rates. Please use it to order work or as a personal reminder. A lot of this work can be accomplished well before launch time thus avoiding delays in the Spring. Please let us know ASAP for smooth sailing.
