

So here we are coming to the end of the 2020 riding season, by the time you read this most of Michigan will likely have seen some snow.

I'm on a number of rider Facebook groups and I do not like what I'm seeing. People are being hit and run and run off the roadway too often, especially in southeast Michigan. I don't know if this is because riders are being deliberately targeted, as some are saying, or drivers are getting worse. Whatever it is this is made worse by the Insurance laws that we now have to deal with. I hope all ABATE of Michigan members are contacting their representatives to fix this injustice.

The Motorcycle Riders Foundation warns us that driverless vehicles are being tested by a number of companies with little information. The MRF and other transportation groups continue to voice their concerns. In response to these concerns' NHTSA has a new website that allows us to see where these autonomous vehicles are being tested on the road.

MRF continues to push anti profiling legislation.

Jinx Rahn is asking for people who have let their MRF memberships lapse to re up so we can keep this important motorcycle rights organization strong.

The RC and Board meetings will be this October with all that's happening it should be interesting. I am hoping to be able to attend.

Be safe, Ride free

Nick
