- DUNS: 080439635
- NAICS: 541330-541410-541420-541340-541611

**Core Competences**

Urban Roadway Design  
 Rural Roadway Design  
 Drainage Design  
 PD&E Studies  
 Intersection Improvements  
 Traffic Studies  
 Utility Plans  
 Site Development

Public Involvement (bilingual)  
 Engineering Data Collection and Analysis  
 Utility Coordination  
 Design Survey  
 Construction Layouts  
 As-built Plans  
 Design-Build Environment

**Past Performance**

Extensive experience of work in Florida on projects for FDOT / County / City in Civil Engineer and all aspects of PD&E and Design of Urban and Rural Highways and general Infrastructure Projects. Our areas of expertise include, Roadway Geometry, Drainage, R/W Usage/Determination/Acquisition, Permitting, Construction Plan preparation, Spec Pkg preparation, Signal Design and Traffic Engineering Studies, QA/QC and Public Involvement; with responsibilities of complete scope preparation, task definition, budget management, project management, quality assurance, quality control, estimating, and construction assistance and supervision. Work on projects for FDOT in Districts 1, 2, 3, 4, 5, 7 and the Turnpike.

**Differentiators**

EOR in the Design-Built arena for the first FDOT Design-Built project that included R/W acquisition in District 3 (The I-10 Rests Areas in Santa Rosa and Okaloosa Counties) and EOR of the project that won the recognition of the State as the most innovative project in 2004.

In the PD&E arena we were part of the team that produced the first study to expand the Selmon Expressway to the east that studied 5 major routes, 20+ sub-alternates and included a very intense public participation program.

- **Disadvantaged Minority Woman Owned**
- **50 years of combined experience in the areas of civil engineering and business development**
