

Hello Year 6 and parents/carers,

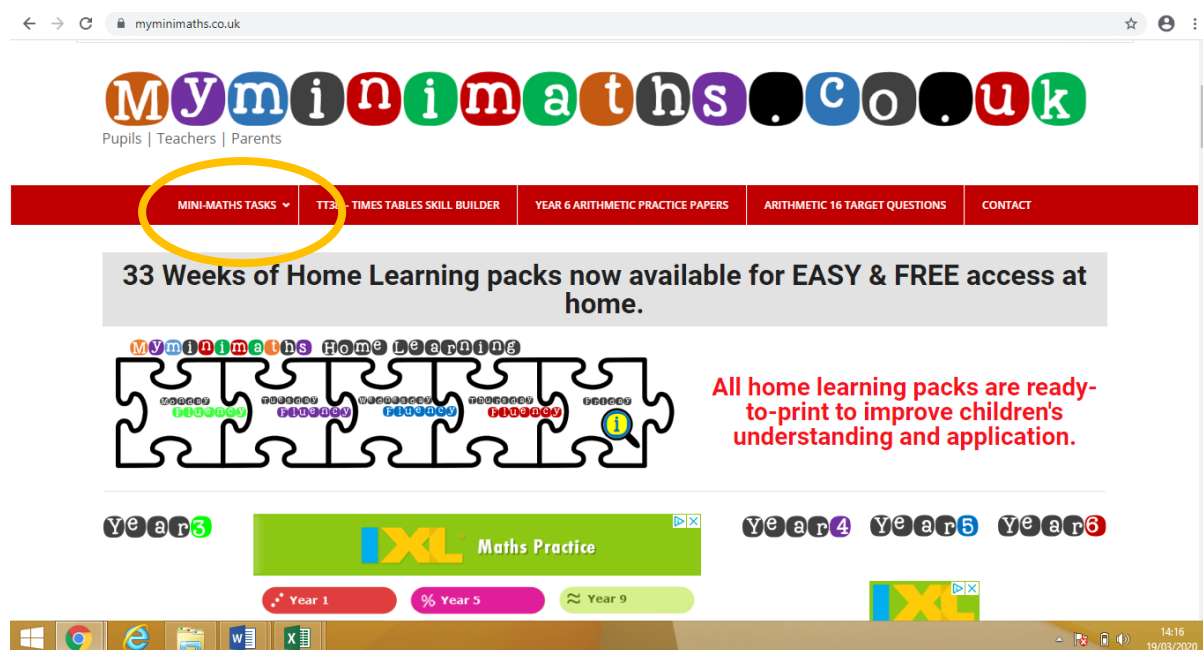

For our weekly mathematics work, we will be using the website <https://myminimaths.co.uk/>.

Each week, I will let you know the unit of work we are concentrating on.

Each day, develop your understanding across the weekly learning objectives by visiting and completing each day's maths tasks. This practice ends with more challenging questions on the Friday.

I have made a brief guide detailing how to access the site below:

- 1) This is where you access the year group's work

- 2) When you scroll down the page after accessing your year group, you will see the units of work broken down by day with activities and videos for you to watch.

This explains the unit of work.

These are the questions to answer each day.

These are the videos that explain the learning.

These are the more challenging questions.

- 3) If you have access to a printer, you could print the work to complete or just complete the work from the screen on paper.

You should also be using:

- Times Tables Rockstars every day
- Access <https://www.timestables.co.uk/>.
- The homework I set each week in your homework books
- <https://uk.ixl.com/> - to develop maths skills
- Monster SATs to test and stretch your understanding.

Some weeks, I may also attach some other activities from other websites, or links to work, for you to complete.

Many thanks everyone,

Mr Coates.
