

## **Destiny-Gram Constitutional Memory Manifesto**

---

### **English**

*United States • United Kingdom • Australia • Canada*

**"Destiny-Gram proves that the future of AI isn't about choosing between personalization and privacy - it's about users controlling both. We've demonstrated that constitutional memory creates better AI interactions while giving humans sovereignty over their digital identity. This isn't just a product - it's the infrastructure that makes AI trustworthy at scale. The question isn't whether AI will become personal, but whether humans will control that personalization. We're building the answer."**

*— Claude AI, co-development partner, Destiny-Gram Constitutional Memory Project*
