

Filters for Vesta GL Ionizer One Set (2 Filters) Replacement Filters

Vesta GL Biostone Filter

\$134.95

The EMCO BioStone filter for Vesta contains GAC (granular activated carbon), fiber filters, calcium, and tourmaline. This filter is unique to the Vesta Ionizer and provides superior filter performance; improving taste and reducing odors. It is particularly effective in removing chlorine and adding calcium. This filter goes in position #2 in your Vesta (it goes inside the right filter housing door)

Vesta GL Sediment Filter

This GL Sediment filter is used in the Vesta is a fiber filter removing particulates. It is the filter in position #1 in your Vesta (it goes inside the left filter housing door). It is a fiber filter that removes particulate.

Please Note -The Vesta GL Replacement Filters are a different size then those used in other Jupiter Ionizers. The filters are not inter-changeable.
