

CETUS TRIBULATION PERIOD?

The purpose of this study is to plot the 3 Major Retrogrades of Saturn in the Constellation of Cetus, the Sea Dragon or 'Leviathan'. The Saturn Retrogrades will start from the October Month in 2025 to September of 2032. This when the Planet associated with Satan, the Adversary enters the Constellation of the Sea Beast, etc. One will suggest, that it will signal the rise of the Biblical AntiChrist. And that in fact, the Bible precisely describes him as being the 1st Beast that rises out of the Sea. The Chart will plot the Retrogrades that will include the Constellation of Taurus as well. In that case, there will be 4 Major Saturn Retrogrades occurring in the Constellation of Taurus. The Point is that the Saturn Retrogrades occurring from the Winter of 2025 to when Saturn crosses the Celestial Gate of GOD or the Golden Gate, it will be approximately 7 Years. The Question is then, could this Span of Time correspond to the 7-Year Tribulation Period or Daniel's 70th Week? One will examine correlation Prophetic inferences from a purely Astronomical Point of View and explanation. Before one delves into the core of the Interpretations, one will provide some Astronomical Context pertinent to the Planet Saturn and the Prophetic Meanings of Cetus and Taurus.
