

# **EATS JAVA**

# **PROSPECTUS**

Eats Java has the potential to be the next Starbucks with up to twice the volume! Developed from the beginning to franchise; while taking into consideration the world of Covid that we live in. We've used the business model of compressed time; compression accelerates the evolution of a company.

The monthly cash flow and profits will warrant Franchisees waiting in line for the next available location. Banks will welcome a qualified Franchisee backed by a proven Franchise.

Eats Java will develop and build from ground up our scaled 3D build-able model and match the location to a Franchisee. Prime locations are everywhere.

Commercial real estate agents and General Contractors will secure and build new targeted locations nation wide. Our sales staff will evaluate potential Franchisees and walk qualified and approved ones through the process.

## **A LITTLE ABOUT EATS JAVA**

Eats Java is the new hip fast food restaurant with "All Your Favorites In One Place". A new era of quick service with our impressive 24' marble wall with a highlighted Eats Java girl; along with our large metal wall prints and a robust efficient back room.

Our state of the art ordering process uses a mobile ordering APP with images. Customers can order and pay before entering; drive up or walk in directly to one of the connect stations and grab & go!

For maximum efficiency we have two drive thrus, a dining room connect station and five printer stations that bypass a POS system. When an order is placed by the customer it goes directly to one or more of the 5 printer stations. This keeps employees on task at their station and products move through the system much quicker. No employee ordering, no drive thru ordering screens and no cash exchanges hands.

The back room is designed for optimum efficiency using automated equipment to produce quality products extremely fast. Eats Java was developed not just for the love of food and coffee but for the love of business.

The full menu, which is unmatched by any coffee or fast food chain, is on our mobile ordering APP. The mobile ordering APP can be downloaded off the website. [www.eatsjava.com](http://www.eatsjava.com)

Videos and slideshow can also be seen on the website.
