Inspection Training**

CERTIFICATE OF COMPLETION

NAWT BASIC TROUBLESHOOTING & INSPECTION

TRAINING

FEBRUARY 1-2 2016

LAUGHLIN NEVADA

Kyle Nelson

NAWT

National Association of Wastewater Technicians

Successfully completed a 12 hour course and passed a written examination demonstrating professional competence in conducting NAWT standard operation inspections of onsite wastewater treatment systems. Passing this course provides training necessary for completion of the written and field examinations for NSF Accreditation on the following inspection topics:

- Why an operation inspection is required
- Preliminary gathering information on the site, including household characteristics
- Inspecting tanks and pumps
- Inspecting media filters, ATUs, and constructed wetlands
- Soil treatment unit inspection
- Completing the final report and what it means

A handwritten signature in black ink, appearing to read "Kim Seipp".

Kim Seipp
