

Certificate of Completion

NAWT

Inspection Training Course

National Association of Wastewater
Technicians
Inspection Training Course

August 29 & 30, 2016
Casa Grande, AZ

Daniel Nelson

NAWT
National Association of Wastewater Technicians

Successfully completed 12 hours course and passes a written examination demonstrating professional competence in conducting NAWT standard operation inspections of onsite wastewater treatment systems. Passing this course provides training necessary for completion of the written and field examinations for NSF Accreditation on the following inspection topics:

Why an operation inspection is required
Preliminary gathering information on the site, including household characteristics
Inspecting tanks and pumps
Inspecting media filters, ATUs, and constructed wetlands
Soil treatment unit inspection
Completing the final report and what it means
