

# Primitive Reflex Essentials

Brain Patterns that govern behavior, impulses, sensitivity to surroundings, and attachment issues are shockingly easy to influence.

## In this 2-day workshop, you will discover

- Why flexion is crucial to establish before extension
- How to establish midlines(x3) so that you can cross them
- How to switch off the components of Tendon Guard that prevent Flexion / Head Control
- How Moro, Grasp and TLR Forward bring in attachment, grounding and stop meltdowns

This holistic class is for OTs and Cranio Sacral Therapists who have taken Foundations for Clinical Neuroplasticity

### Intermediate Level

CEU's by

Cardinal Capers

Fort Collins CO

970-818-8678

PRE!: 2-day workshop

Dates of course: Oct 6/7 2018

Time: 9:00am – 5:30pm (1hr lunch@1:00)

Location: 1355 W Garden of the Gods Rd #130,  
Colorado Springs, CO 80907

CEUs: 7x2 days = 14 total

DAY 1  
Registration  
at 8:30 am

[Click here to register: \\$150](#)

HANDS-ON, EXPERIENTIAL TRAINING in facilitating Neuroplasticity  
Via PowerPoint presentation, group work, discussion, Q&A, Technique practice of Reflex Integration initial processes and non-invasive developmental facilitation with competent return demo requirements  
Dress for movement and floor work

Maxine Haller, OTR/L, is a mom who saw the results of the movement based interventions first-hand. She experienced such drastic change with her twice gifted son that she trained within several modalities finding her OT voice within them, as well as re-discovering the history of motor and neuro rehab within Occupational Therapy domain and practice. She further developed clinical application principles and the FCN class was born. It is her mission to empower professionals to add these techniques to their practice, and experience even better results for their clients.

<input type="checkbox"/> PRE – level 1 – 2 days Prerequisites: FCN 14 hrs, incl. manuals, certificates	\$495	\$450.00
<input type="checkbox"/> Previous FCN/RMT combo Student's discount		\$395.00

#### Financial Disclosures:

Maxine Haller OTR/L is the owner of Maxine Haller and Associates DBA Cardinal Capers and as such the class fees for speaking at her educational activities are part of the company's income. When Maxine consults and mentors this is done as part of the training her company offers. The fees from this also form part of the company's income.

# Primitive Reflex Essentials

## Level II - Flexion

Completion requirements: (each day) full attendance, competent return demo's, test and survey completion

### Level 2 - Flexion (14 CE hrs)

Appropriate for any Therapist who has completed Foundations for Clinical Neuroplasticity or FCN/ RMT combo

#### Course Objectives:

- ✓ Review the Foundations of Primitive Reflex Integration  
Safety, Connectivity, Neural Net building and Brain dominance.
- ✓ Explain why these are foundational to all Reflex Integration
- ✓ Explain the effects of unmitigated stress on processing style, visual and auditory processing, communication and safety
- ✓ Complete a full dominance profile eval per Carla Hannaford's book the Dominance Factor
- ✓ Discuss the role of Tendon Guard in Reflex Integration
- ✓ List the two TG muscle sets that prevent Moro and TLR forward from integrating
- ✓ List 3 techniques for mitigating these
- ✓ Perform a return demo of the of evaluation of the presence of TG.
- ✓ Explain flexion/extension confusion and how to unravel it
- ✓ Explain the significance of safety, flexion, and attachment to self wrt meltdowns
- ✓ Explain the role of safety scanning in the disruption of reflex integration
- ✓ Give the stages of Reflex integration per Brunstrom
- ✓ Explain the use of PNF in Reflex Integration
- ✓ Explain the purpose of integrating a Reflex
- ✓ List the 4 steps of integrating a reflex
- ✓ List the 4 symptoms of inappropriately active Hands Pulling Reflex
- ✓ List the 4 symptoms of inappropriately active Moro Reflex
- ✓ List the 4 symptoms of inappropriately active TLR Reflex
- ✓ List the 4 symptoms of inappropriately active Grasp Reflex
- ✓ Perform a return demo of the reflex integration protocol with grading principles for all 4
- ✓ Explain the cognitive development associated with these 4 reflexes as related to academics

The parts of the course that helped me learn were the demonstrations with real patients, feeling the movements and sensations in my own body, the videos and the organized logical content. This is the most helpful course I have taken. It will revolutionize your treatment sessions.

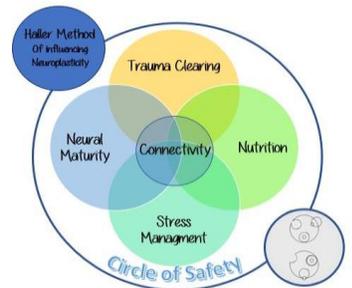

A.M.T

Blew me away. It was 100x more than I ever expected. The way Maxine taught the class – the flow, her ability to organize and complete demo's, the timing and reinforcement of points and the summary were so effective. It has become my framework for how I will work. Maxine is the most wonderful instructor I have ever known in my 50 years on earth.

K.L.M.

Best course I have ever taken! Foundation for all therapies. I feel energized, competent and excited to treat those patients I thought had "plateaued"

M.S.
