

TAMIFLU REQUEST FORM

When started early, Tamiflu may shorten the course, severity of influenza - and duration of infectiousness to others.

Start this medication as directed if you have close contact with an individual known to have influenza or soon as you develop flu-like symptoms. This, like any medication, may have side effects. [CLICK HERE](#) for more information about side effects.

DO NOT USE TAMIFLU IF:

You may be pregnant
Have liver or kidney disease
Take Plavix (clopidogrel)
Plan to get the nasal influenza vaccine

For more information, you may reach Dr Paul Heinzelmann by email, text or call.
