

N-Ext™

N-Ext Level Fertility

The Greene County Fertilizer Company specializes in manufacturing Fertilizer Products, Specialty Fertility Products, Private Label and Custom Blends for the Agriculture, Lawn and Landscape Industries. Our product line consists of liquid fertilizer products that are easy to dilute and apply. Our liquid humic acid product is an excellent addition to any fertilizer program for correcting soil issues. Your technicians will love working with the products.

Our fertilizers are complete products. There is no need to continue to mix additional nutrients to receive great results. Pesticide products can be tank mixed with all Greene County Fertilizer Company Products.

The science behind Greene County Fertilizer Company's fertilizers is a balance of plant science and soil science. The turf and plants receive the nutrients they need to thrive and the soil receives the oxygen and carbon it needs to build sustainable fertility. Nitrogen inputs with Greene County Fertilizer Company products are half of the inputs required by typical synthetic fertilizers.

All of our products are Phosphorus free. The soil activity that is stimulated by our fertility products will provide the phosphorus needed to maintain healthy plants. When you use our soil amending fertilizers and specialty fertility products, you are free to focus on providing good service, solving seasonal problems, and cultivating a good relationship with your customers.

N-Ext Humic12

Liquid Humic Acid

N-Ext Humic12™ is a unique entry into the humate market.

While the concentrations of humic are easily identifiable in the market place, the process of **N-Ext Humic12™** stands out against the competition. Our "Long Brew" technique using high quality oxidized lignite, allows for a cleaner, more flowable product with enhanced biological activity.

The benefits of **N-Ext Humic12™** in your program are:

- Increased root growth
- Increased chlorophyll content
- Increased nutrient uptake
- Improved soil structure
- Improved water retention
- Improved plant quality

Application rates of **N-Ext Humic12™** vary; apply 2-3 times per year for maximum results at 3-6 ounces per 1,000 sq. ft.

Guaranteed Analysis

Active ingredients:
Humic Acid from Leonardite...12.00%

Inactive ingredients:
Water, Potassium Hydroxide.....88.00%

N-Ext Rgs

Soil & Plant Stimulant

N-Ext RGS™ functions as a biological magnifier.

N-Ext RGS™ is designed to increase rooting and decrease stress pressure caused by heat and drought. The biologically active material contains Humic Acid, Sea Kelp, and plant growth hormones to aid in initial spring green up, to buffer and extend nitrogen release rates, and to add oxygen to the soil profile for greater nutrient uptake.

Apply at a minimum rate of 3 ounces per 1,000 sq. ft. in the early spring with pre-emergent application or with first nitrogen application. Can be readily applied with lower volume, ride-on equipment without clogging issues or requiring sprayer modification.

Guaranteed Analysis

Humic Acid.....6%
Fulvic Acid.....3%
Sea Kelp Extract.....3%

Product contains non-plant food ingredients:
Humic Acid 6% (derived from Leonardite), Coldwater Kelp 3% (as growth stimulant).

Derived from:
Leonardite Shale, Ascophyllum Nodosum

18-0-1 GreenePunch

Lawn Fertilizer

18-0-1 GreenePunch™ Lawn Fertilizer is engineered to be a complete product for all varieties of turfgrass. It is formulated to produce a quick green-up response and maintain consistent color for 6-8 weeks.

- **18-0-1 GreenePunch™** will produce a strong root mass which will grow deeply into the soil.
- It will stimulate soil activity necessary for building sustainable fertility.
- For cool season grass varieties, it is the recommended product for every lawn application.
- For warm season grass varieties, it is The recommended product for applications during the cooler months.
- **18-0-1** is not recommended for non-irrigated lawns during periods of drought stress.

Guaranteed Analysis

Total Nitrogen (N).....18%
9% Urea Nitrogen.....9% Ammonia
Soluble Potash (K).....1%
Sulfur (S).....1%
Iron (Fe).....1.5%

Natural Green Systems

LAWN & PEST

Product contains non-plant food ingredients:
Humic Acid 5% (derived from Leonardite), Coldwater Kelp 1% (as growth stimulant).

Derived from:
Urea, Ammonium Nitrate, Sulfate of Potash, Ferrous Sulfate, Leonardite Shale, Ascophyllum Nodosum.

Contains 50% Slow Release Liquid Nitrogen.
